Learning and Capability Services

- + Identify skill gaps in your organisation
- + Preparing for upgrades, new lines or technology
- + Customised training based on your facility
- + Regulatory compliant training
- + Knowledge retention
- + Standardised training rolled out globally
- + Augmented Reality

Challenges

- 01 Skills shortages
- 02 Matching training time with production demands
- 03 Upskilling training operators quickly to run sophisticated facilities
- 04 To continuously build capability in the workforce
- 05 The operator not being trained on the actual system they will use
- 06 Finding a solution provider that offers customised training
- 07 Meeting compliance requirements
- 08 Boosting manufacturing performance

Bridge the gap
in your learning

Introduction

Zenith Technologies is a globally trusted provider of high quality online, classroom and blended learning solutions for customers in Life Science industries. Our training experts can create both generic and customised courses to suit every system training need.

Zenith is your training partner. Through our site service teams, we can develop and refresh your training to target your pain points, providing effective continuous learning. We are able to utilise assets from your customised training system to produce eLearning, delivering targeted training and simulated exercises on demand.

We will work with you to develop a learning path, to cover the journey from onboarding new starters, through to effective manufacturing associates. Continuously linking demonstrated capability to control system access level.

Services

Customised system training

- 01 Deliver high quality customised instructor-led training focused on capability development
- 02 Training designed for key roles in your manufacturing organisation
- 03 Based on your system and operating practices
- 04 Captures capability building exercises and deploys them to standard business computers without installation

Expert training

- 01 Delivering expert training to develop knowledge
- 02 Competency based training and education
- 03 Multiple platform technology training

Cross training

- 01 Driving cross training to retain knowledge
- 02 Reducing resource single point of failure
- 03 Increasing the team effectiveness and flexibility

Graduate and young engineer training

- 01 Training programme designed to both develop talent and reduce costs
- 02 No headcount risk to you and time to select the perfect fit for your organisation
- 03 Developing an organisational learning capability based on the reflective action learning cycle

Targeted online learning modules

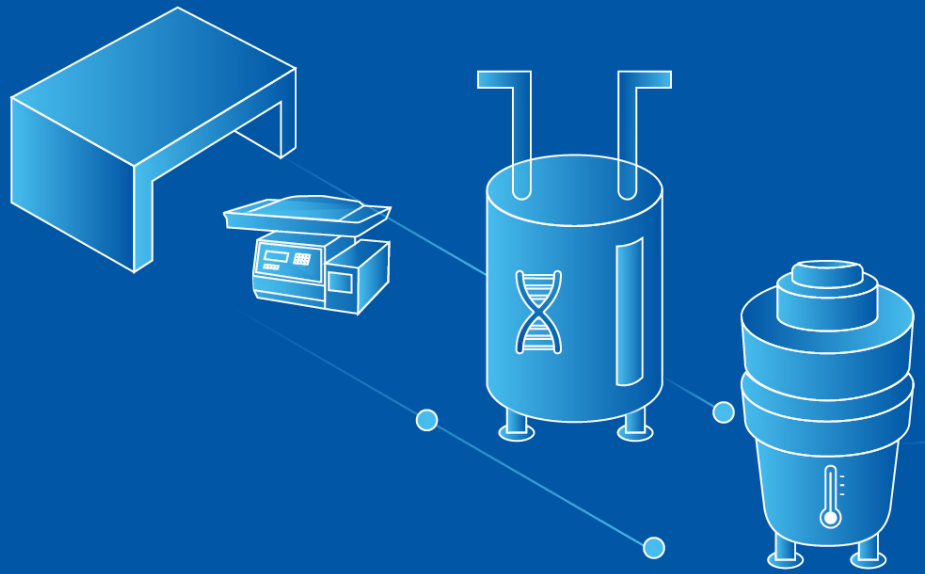

- 01 Online learning to reduce overall cost
- 02 Targeted training modules for use in GMP
- 03 Quality systems as NC actions

Meeting your challenges

At Zenith Technologies we take the headache out of sourcing the right learning solutions for Life Science industries. Using the latest instructional design and distance learning techniques, we provide focused and customised learning solutions.

- 01 Identify skill gaps within your organisation
- 02 Increase the competency levels of your teams
- 03 Access customised training for different roles or locations
- 04 Virtual training customised with the look and feel of your system
- 05 No license costs or installation
- 06 Deployment of custom training in a web browser
- 07 Ensure your teams are prepared for any changes in production / plant
- 08 Provide real world training in a safe environment
- 09 Ensure regulatory compliance is met
- 10 Deliver real-time updates, metrics and KPIs on individual and team progression
- 11 Align training requirements with production demands
- 12 Boost manufacturing performance
